

JS-5+ Series

Introduction

JS-5 Series Interconnect box integrates the box body and various interfaces to provide an orderly, simple and compact conference connection solution. It uses pneumatic movement and mechanical latching mechanism to conceal the interfaces, such as for the power supply, network, phone, video, audio, PC video, switchboard, USB and so on, for the users to power the device and connect the signals. Open, press the top panel slightly, the panel of the Interconnect box will automatically prop up at 45° and various interfaces are shown up before the users. Close, press the top panel slightly, the Interconnect box will automatically retract to level with the table surface after retracted.
